Art Unit: 1731

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a) process wherein the supporting material and firing material have same physical properties;
- b) process wherein the supporting material and firing material have different physical properties;
- c) process wherein gas streams keep the items floating; and
- d) process wherein magnetic field keeps the items floating

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

- | | |
|------------|----------|
| species a) | claim 6 |
| species b) | claim 10 |

Art Unit: 1731

species c)	claim 11
species d)	claim 12

The following claim(s) are generic: 1-5 and 13.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Claim 1 is either obvious or anticipated by EP 0530370 or EP 0583620. Accordingly, the special technical feature linking the two inventions does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore, restriction is appropriate.

4. A telephone call was made to Andrew Meikle on February 26, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
